

ULC30EX PLUS

An effective natural product for ulcers

What is it?

An effective herbal powder that targets and heals both foregut and hindgut ulcers. Results are noticeable after a short period. The supplement can also be used to prevent ulcers when necessary

A healthy functioning gut is essential for the health and well being of your horse and pony.

Potential sources of ulcers include cereal rich feeds, stress, lack of pasture/turnout, wormers, NSAIDs (e.g. bute). More information about ulcers can be found on our [Equine Ulcer](#) factsheet. During a human study in 2014, certain herbal extracts contained in **Ulc30Ex PLUS** were shown to promote mucus production. This extra mucus may act as a barrier to acid in the stomach, which will allow the damaged tissue to heal and prevent future occurrences of ulcers. Another human study in 2018 found that certain herbal extracts contained in **Ulc30Ex PLUS** were more effective than acid-suppressive drugs. The same herbal extracts are also known to destroy the bacterium *Helicobacter pylori*.

Helicobacter pylori can thrive in the hind gut and is associated with the occurrence of hind gut ulcers in horses.

Ulc30Ex PLUS is suitable for use by all horses and ponies from racehorses, competition horses to happy hackers and those retired.

Suitable for all ages including foals.

Symptoms of Ulcers

Symptoms of ulcers can be subtle or severe. They can result in physical or emotional difficulties, which can make handling or riding your horse difficult or even dangerous. For a comprehensive list please refer to our [Equine Ulcer factsheet](#).

What does **Ulc30Ex PLUS** do for your horse?

Ulc30Ex PLUS maintains the normal function of the fore gut and hind gut. It will alleviate gastrointestinal discomfort and relieve inflammation. It will heal all types of ulcers and assist in preventing them. As a result, the herbs will help relieve muscle soreness, improve appetite and digestion. It will help the horse feel well again and in turn reduce moodiness and irritability. Your horse will be happier in himself and enjoy training and riding again.

Information about the herbs and other ingredients found in **Ulc30Ex PLUS** are listed below:

Herb	Latin name	What the herbs do?
Ginger	<i>Zinzibar officinale</i>	Anti-microbial, anti-bacterial, anti-oxidant, anti-inflammatory
Guduchi vine	<i>Tinospora cordifolia</i>	Detoxifier, heals ulcers & digestive disorders, immune booster, anti-inflammatory, anti-microbial, boosts liver function
Liquorice root	<i>Glycyrrhiza glabra</i>	Treats gastrointestinal issues, including ulcers, anti-oxidant, anti-inflammatory, anti-microbial, anti-viral
Indian gooseberry, harad & baheda	<i>Triphala churna</i>	Anti-microbial, anti-bacterial, anti-oxidant, anti-inflammatory, adaptogenic. Promotes effective digestion, absorption, elimination and rejuvenation. Promotes good bacteria in the gut, inhibits the growth of bad bacteria.
Turpeth	<i>Operculina turpethum</i>	Coats gastric ulcers enabling them to heal. Prevents further ulcers from occurring.
Nutgrass	<i>Cyperus rotundus</i>	Treats diarrhoea, gastro-intestinal issues. Anti-inflammatory, gastro-protective, anti-bacterial, anti-inflammatory
Sanchal	<i>Black salt</i>	Relieves digestive discomfort, boosts digestion
Digestive aid	<i>Saccharomyces metabolites</i>	Anti-oxidant, anti-inflammatory, immune booster

Other products

If necessary, the results of **Ulc3oEx PLUS** can be greatly enhanced, when used together with some of our other products:

- For horses with severe symptoms of ulcers, use **Pre-Ulc** powder first before **Ulc3oEx PLUS** liquid (see product sheet). **Pre-Ulc** powder is extremely effective at starting the healing process in horses with very severe symptoms.
- For horses with additional health issues e.g had a course of antibiotics, had colic, laminitis, illness or needs an immune boost, use **Remount** at the same time as **Ulc3oEx PLUS**. **Remount** is a very successful liver boosting tonic that will increase health and vitality. See the **Remount** product sheet for more details.
- If your horse is anxious due to ulcers or other reasons, use our calmer **Silent 4** at the same time as **Ulc3oEx PLUS** liquid. See the **Silent 4** product sheet for more details.

Testimonials

3rd Dec 2019

My horse has suffered from ulcers for a couple of years now! She's been scoped multiple times and has been on the peptizole medication multiple times too. I can just tell when she has the symptoms and I have been correct every time she's been scoped so now I no longer scope or give her the vet medication and she's been on the Ulc3oEx PLUS for just under a year now I think, and she is much much better on it so I just continue to give it to her as it seems to work perfectly and no longer has any symptoms!

Kind regards,

Zara

5th Nov 2019

After ruling out hormones and pain, I had my mare scoped for ulcers. She was diagnosed with Glandular and Squamous, grade 2 and 3 ulcers. She was treated with GastroGuard, nothing had changed so she had a course of omeprazole injections, she then scoped clear, however 2 weeks later the symptoms were back. We went through this cycle 5 times, finally having a biopsy and was then treated omeprazole and sucralfate. £7k later I had to find a long term sustainable solution. I looked to the ulcer forums, Ron Fields products had good feedback, so I gave him a ring. Ron suggested Ulc3oEx PLUS. 3 months later my mare has no ulcer symptoms. I saw a difference after a few days, if you don't I would recommend giving Ron a ring, with a few short term tweaks my mare has been symptom free, even the change to her winter routine!

25th Sept 2019

Hi Ron I'm in absolute shock by using this supplement. Within 3 days my horse is a different person not so much windsucking in the paddock, comfortable around his girth area and the change in attitude to exercise is unbelievable. I will keep you updated, but so far I'm very happy .

Many thanks Laura

I have just finished my 1st small 500ml of Ulc3oEx Plus. My mare has become an angel !! She was becoming very girthy and grumpy around me. No idea if she has ulcers, but this product has definitely done something. She's relaxed to ride and stoppable ! Her eyes are bright and full of interest and she just looks great. I have just ordered the 1ltr to give as a maintenance tonic.

Zoe

9th April 2020

Hello, just wanted to update you about Alfred and his ulcer treatment. We are on 40 mls of liquid at the moment and will start to reduce in a couple of days. He is completely back to normal, calm, easy to groom and pick feet up and a happy boy . Thank you again for all your help and advice.

7th April 2020

Good morning,

Just to let you know that we were making really good progress prior to lockdown! Having used the powder for a longer period we then went on to the liquid and touch wood she was back to being a happy horse again!

Hattie is now on a maintenance dose of the liquid and I'll be ordering another bottle today as even though she's on lockdown too in livery I wouldn't want to change anything at the moment!

Kind regards

Rebekah

Hi Ron, my horse has had a flare up of ulcers, I had some of your pre ulc powder left from my last order (she wouldn't eat it last time) and so I thought I'd give it another try. She ate it this time and markedly improved. Now I've ran out she's deteriorated hugely!! Is it possible to buy this from you in a bigger qty so it works out more cost effective? I know it's designed to be a pre treatment to the liquid but it's had such an impressive effect I wonder if I should keep her on it for longer? Let me know your thoughts and what we can work out
