

NB50-30

An effective relief for coughs

What is it?

An effective Ayurvedic herbal liquid that relieves and cures coughs. Results are noticeable after a short period of use.

Healthy horses very rarely cough, so if your horse has a cough then you need to investigate the cause. Horses cough for a variety of reasons including allergies (e.g. dust, pollen), asthma, viruses, infections or from hard exercise. **NB50-30** was originally developed for racehorses that got Exercise Induced Pulmonary Haemorrhage from racing or hard training. However, it was soon found out the it could help with all manner of coughs in equines.

NB50-30 is suitable for use by all horses and ponies from racehorses, competition horses to happy hackers and those retired.

What does NB50-30 do for your horse?

Your horse may have a dry or wet cough and may or may not produce mucus from their nostrils, depending on the cause of the cough. **NB50-30** will help ease inflammation in the respiratory tract, help ease breathing difficulties, ease congestion and get rid of mucus, boost immunity to help fight infections and relieve symptoms caused by allergies.

Information about the herbs found in **NB50-30** are listed below:

Herb	Latin name	What the herbs do?
Ginger	<i>Zinzibar officinale</i>	Anti-microbial, anti-bacterial, anti-oxidant, anti-inflammatory

Any type of cough caused by

- Allergies - pollen, dust etc.
- Asthma or other respiratory conditions
- Viruses
- Infections
- Exercise / training

Testimonials

Sarah Hammond Just wanted to say how fantastic **NB50-30** is. Horse had a Little bit of a cough when starting work after having done a lot of travelling. So I put her on **NB50-30** 2 days later no coughing. Very happy mummy. 👍

Morning Ron, and thank you for sending the **NB50-30**. I've been amazed at the difference it's made and how quickly....literally within 24 hours he had stopped coughing up the phlegm, and his nose has stopped running after work too.

Many thanks

Adele

Michelle Joyce March 2018

Hi Ron

Sorry I missed your call, the vet when he came out to her xmas time said she had a bad dust allergy and a lung infection which he gave her antibiotics (Norodine) and Ventipulin to help her breathing. The lung infection cleared but she still coughs and heaves as she breathes the vet advised the usual soaking hay etc and she is now just at grass with a very small amount of chaff that I am also wetting for her, i shall give the next sample a try and let you know how we get on.

Many Thanks

I phoned last week to purchase some **NB50-30** as we have just finished the trial container you kindly sent us, there is a considerable improvement in her breathing and she is coughing much less.
